

DcSim – Status Report

Achieved

- Parser for HOCON configurations
- Electrical network solver (DC)
- Support for trains with power profile
- Time simulation and CSV output
- Verified with MinimalTest

Remaining

- Moving trains (position + topology updates)
- Multiple substations and dynamics
- Time-controlled topology (switches, faults)
- Visualization and export
- Timetable-driven control
- AC-system and hybrid networks
- Coupling to public grid
